### Sealed Box Family of SVS Subwoofers

Three years ago, the powerful little SB12-Plus shook the high-end world with a micro-sub Sound and Vision Magazine called *well engineered* and ... *very impressive*. It gave our customers depth, power and features unheard of given its diminutive size and price. In 2010 the "SB" line becomes not one, but *three* new subs.

New superlatives will be in order, starting late this spring. With over two years of work with state of the art digital amps and sealed-box woofer technology, the completely new SB subs raise the bar on industry again. The expanded family will use two new cutting-edge DSP-controlled amps that belt out even more power than their predecessors. Both are exclusive to SVS, and designed in conjunction with the top suppliers in the audio industry. In short, no one else has them.

And with small sealed subs, creating true concert and theater quality bass is a technical challenge, one which requires state of the art power and control. "DSP", exploited as a performance tool, and not simply as a three letter buzz-word, is another weapon working for SVS customers. Finally, artfully tuned, right-sized subs, packed with features, impeccable quality and our legendary performance. Small really is big at SVS after all these years. - [Continued on back.](#)

### Specifications:

MODEL NAME	SB12-NSD	SB13-Plus	SB16-Ultra
Configuration	Front-Firing Box	Front-Firing Box	Front-Firing Box
Design	Sealed	Sealed	Sealed
Dimensions	14" h x 14" w x 14" d / 360x360x360mm	17" h x 17" w x 17" d / 440x440x440mm	21" h x 20" w x 19" d / 533x508x482mm
Weight	41lbs.	95lbs.	115lbs.
Freq. Response	25Hz -150Hz ± 3dB	21Hz -150Hz ± 6dB	18Hz -150Hz ± 6dB
Power	350W TS-350D DSP amp	800W FS-800D DSP amp	1200W FS-1200D DSP amp
Enclosure	CNC'd, MDF	CNC'd, braced MDF	CNC'd, braced MDF

### SB12-NSD Features:

- SVS 12" NSD woofer with AL cone
- 350 watt DSP amp, "green" power supply
- CAD design, CNC cut, precision assembled
- Front-firing, sealed, recessed driver
- Compliant floor mounts, threaded/removable
- Assembled and tested exclusively by SVS
- Heavy-duty detachable 8 foot power cord
- Hand-laid charcoal black laminate finish
- Chrome steel grill retainers
- Compact 13" cube

Est. MSRP \$699

### SB13-Plus Features:

- 800 watt DSP amp with LCD control
- 13.5" long-throw Ohio-built SVS woofer
- Easy to use LCD one-button feature controller
- "Green" power supply with true sleep mode
- Wood veneer or piano gloss accents
- Elegant input/output plate with XLR I/O
- Polymer foot cones with optional plated steel spikes
- Custom perforated mesh grills with mag retainers
- Stackable, compact form factor

Est. MSRP \$1699

### SB16-Ultra Features:

- 1,200 watt DSP amp with LCD control
- State of the art 16" SVS woofer with neo motor
- Easy to use large LCD one-button interface
- Parametric EQ and extensive tuning features
- "Green" power supply with true sleep mode
- Real wood veneer or piano gloss black
- Elegant input/output plate with XLR I/O
- Polymer foot cones with included steel spikes
- Custom perforated mesh grill with mag retainers
- Two-way RF remote control with LCD display

Est. MSRP \$2699

**SB12-NSD. Early 2010.** The impressive SB12-Plus is discontinued, but replaced by the even better SB12-NSD. More efficient, with true second order roll-off characteristics to better complement the inherent room gain in today's homes. Slightly larger than the outgoing sub, it uses completely new DSP pre-amp which allows SVS engineers unprecedented tools to fine tune performance. The NSD woofer uses the best design and materials of the Plus driver line, only trimming cosmetic niceties. Intuitive SVS features prevail, but now with *digital* rotary controls and a durable platform making more clean power too. Black vinyl is the sole finish choice making perfect pairings with S-Series speakers or with any system where small, but powerful, is needed.

**SB13-Plus. Early 2010.** Bigger, much more powerful than the old SB12-Plus, and styled to perfectly match with either the S-Series or M-Series SVS speakers. The SB13-Plus likewise features audiophile 2nd order tuning, with power that will run flat and strong below 20hz in most rooms. Designed with the latest DSP controls, our new digital amps provide access to all features via a simple to use LCD display. The amp's slick feature knob and extensive I/O jacks are neatly integrated into a whopping 800 watt power stage. It's all seamlessly mounted into our signature mid-sized cabinet design tailor-made for stacking. With a 17" cube form-factor and high-end touches like the magnetic perforated mesh grill and real wood or hand-polished gloss accent panels, this is the nuanced deep bass small sub that no brand has ever offered under \$2K. Generously borrowing parts and technology from our Ultra subs, the look and feel of the SB13-Plus will give pause to anyone poised to spend \$4K on some other brand. We're pretty sure that expensive sub has met its match.

**SB16-Ultra. Fall 2010.** We pull out all the stops on this one. Our goal was simple, make the most potent mid-sized premium sealed box sub you can buy. The foundation of the SB16-Ultra will be the astounding performance our revolutionary new 16" neo motor woofer, in testing now. Coupled to this state of the art driver will be a stunning new DSP 1.2kW digital amp with upgraded logic controller, advanced RF remote with dedicated display and large format amp mounted LCD feature panel, all standard. Of course SVS Ultra subs always come in a range of veneer and gloss cabinets, including new black oak and cherry. The technology and performance of this latest SVS flagship will set a new standard in subs in the \$3K price class. Expect pairs and our new AS-EQ1 sub EQ to be the dream system of 2010.
